

# **Report File FULL STACK**

Student Name: Sukhjinder Singh UID: 23BAI70078

Branch: BE-AIT-CSE Section/Group: 23AIT-KRG-G2

Semester: 5th Subject Code: 23CSP-339

**Subject Name:** Full Stack

**Aim -** To create a responsive banking interface with deposit/withdrawal functionality using HTML5, CSS3, and JavaScript.

### **Objectives:**

- 1. Design a banking UI with balance display
- 2. Implement deposit/withdrawal buttons
- 3. Make the interface responsive using media queries
- 4. Add interactive elements with JavaScript
- 5. Validate form inputs

### **Hardware Requirements:**

- Processor: Intel i3/Ryzen 3 or higher
- RAM: 4GB minimum
- Display: 1366x768 resolution

# **Software Requirements**

- VS Code/Sublime Text
- Chrome/Firefox Developer Edition
- Live Server extension
- Git for version control

### **About the Experiment**

This lab introduces:

- Semantic HTML5 structure
- CSS Flexbox/Grid for layout
- Responsive design principles
- DOM manipulation basics

• Form validation patterns

### **Key Concepts:**

- Media queries for responsiveness
- CSS variables for maintainability
- Event handling in JavaScript

#### **Code Implementation**

```
HTML:
```

```
<div class="bank-interface">
 <h2>Account Balance: <span id="balance">$1000</span></h2>
 <input type="number" id="amount" placeholder="Enter amount" min="0">
 <div class="btn-group">
  <button onclick="deposit()">Deposit</button>
  <button onclick="withdraw()">Withdraw</button>
 </div>
 </div>
CSS:
:root {
 --primary-color: #2c3e50;
 --secondary-color: #3498db;
}
.bank-interface {
 display: grid;
 gap: 1rem;
 max-width: 500px;
 margin: 2rem auto;
 padding: 2rem;
 border-radius: 8px;
 box-shadow: 0 2px 10px rgba(0,0,0,0.1);
@media (max-width: 600px) {
 .bank-interface {
  padding: 1rem;
  margin: 1rem;
 }
JavaScript:
let balance = 1000;
```

```
function updateUI() {
 document.getElementById('balance').textContent = `$${balance}`;
document.getElementById('amount').value = ";
function deposit() {
 const amount = Number(document.getElementById('amount').value);
 if (amount > 0) {
  balance += amount;
  updateUI();
}
function withdraw() {
 const amount = Number(document.getElementById('amount').value);
 if (amount > 0 && amount <= balance) {
  balance -= amount;
  updateUI();
 } else {
  document.getElementById('message').textContent = 'Invalid withdrawal amount!';
 }
}
```

## **Expected Output**

- 1. Clean banking interface with:
  - Current balance display (\$1000 initial)
  - o Input field with validation
  - o Deposit/Withdraw buttons
  - Responsive layout (collapses on mobile)
- 2. Functional balance updates
- 3. Error messages for invalid inputs
